# U.S. EXPORT SALES

---

- Outstanding Export Sales  
(Unshipped Balances )  
on December 8, 1974
- Export shipments in  
Current Marketing Year
- Daily Sales reported  
December 9-17

--As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our brief experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

EXPORT SALES REPORT

Comments on December 19, 1974, release covering the week ending December 8.

Wheat. The apparent export commitment for 1974/75 declined by almost 300,000 metric tons (M.T.) during the week ending December 8. This was the first significant decline in the commitment since the start of the season and was brought about by a drop of almost 400,000 M.T. in outstanding sales to unknown destinations. Portuguese purchases of about 130,000 M.T. of U.S. wheat were recorded for December-March delivery under the daily reporting system during the December 9-17 period. These purchases were made by a Portuguese Government grain team visiting the U.S. Portugal recently instituted a direct buying policy for grains, replacing the tender system previously used.

Feed Grains. There was no change in the 1974/75 apparent export commitment during the week covered by this release. However, the Portuguese Government grain team purchased over 300,000 M.T. of corn for December-April shipment, likewise registered under the daily reporting system during the December 9-17 period. These purchases reflect a smaller 1974 corn crop in Portugal and somewhat larger feeding requirements.

Rice. The apparent export commitment for 1974/75 increased by 60,000 M.T. during the week. This was the sharpest gain recorded in some weeks but only represents an annual rate about in line with the current USDA export estimate.

Soybeans. During the week covered by this release the unadjusted annual rate of exports moved up sharply to 14.4 million M.T., 400,000 M.T. above the higher range of the USDA estimate for 1974/75. Outstanding export commitments to Japan now exceed 4.1 million M.T., well in excess of the 3.15 to 3.25 million M.T. the Japanese Ministry of Agriculture has indicated would be imported from the U.S. in 1974/75. Import requirements for Japan are expected to total about 3.5 million M.T., including 300,000 M.T. from Brazil and the PRC and the remainder from the U.S. Japan is expected to crush 2.7 million M.T. of soybeans and about 750,000 tons of soybeans will be used for food uses in 1974/75. Japanese soybean crushing facilities would be operating at about 75% of estimated capacity this season, slightly above the U.S. rate of 70%.

Soybean Cake and Meal. In the week ending December 8, the unadjusted annual rate of exports for 1974/75 continued under 4.0 million M.T. significantly below apparent export commitments and the USDA estimate. Exports dropped to only 68,100 M.T., the lowest weekly total in recent weeks. Apparent export commitments dropped below 8 million M.T. for the first time since October 27.

Soybean Oil. Uncommitted supplies of soybean oil for export on a near-term basis continue to be short. During the reporting period Spain, normally an oil exporting country, purchased an initial 10,000 M.T. of U.S. soybean oil. In view of the domestic shortage of vegetable oil, particularly olive, and the inflationary pressures, Spain is expected to purchase additional quantities of soybean and sunflower oil for importation during 1974/75. Peru reportedly was unsuccessful in its attempt to purchase up to 14,000 M.T. of U.S. soybean oil for prompt shipment and continues actively seeking offers for Dec/Jan shipment.

Cotton. Exports during the week totaled 92,000 running bales, the largest weekly volume this season. Outstanding sales of upland again declined less than exports and total apparent commitment increased marginally.

**NOTICE: Because of Christmas holiday schedules, an abbreviated U.S. Export Sales report will be issued December 27, 1974. This report will include only the summary tables normally published on pages 2 and 3. The regular format will be resumed with the report covering outstanding export sales for the week ending December 22, 1974, which will be issued January 3, 1975.**

SUMMARY - APPROVAL AND DAILY REPORTING SYSTEMS  
(Oct. 7 - Dec. 17, 1974)

The following table updates the data on approvals reported last week and includes information not previously reported on approval requests which were not approved.

| Soybeans                 | 130                     | 110                            | 132                    | --                                |
| Soybean Cake<br>and Meal | 50                      | 525                            | --                     | --                                |
| Total                    | 8,368                   | 1,269                          | 1,973                  | 6,204                             |

1/ Includes approvals which (1) were made under the prospective sale approval system in effect October 7-21 which did not result in firm sales or (2) were cancelled at the exporter's request.

2/ Includes approval requests which were (1) referred for consideration but withdrawn prior to the FAS decision or (2) disapproved in part.

A total of 105 requests for approval have been received, of which 81 were approved, 17 fell through or were cancelled, and 7 were not approved. There may be some duplication in the figures shown in the above table since some sales approvals expired and were subsequently resubmitted.

The above table summarizes slightly more than two months of activity under this system. The data does not include sales under PL 480. Data in the first two columns are reflected in the following tables covering daily and weekly reports. Similar data will be released periodically.

In the past two months, the Department has discussed with officials of many foreign countries their buying plans in advance of actual purchases. In several instances, an understanding was reached to modify these plans so that it was not necessary to question contracts once made. The voluntary approval system encourages such discussions of intent and lessens U.S. Government interference with actual export trade.
